- R13 OFFICIALS** of the Meeting are as given in the Meeting Supplementary & Final Regulations.
- R14 MARKING AND PENALTIES** will be as per the appropriate section of the MSA Blue Book 2016, except for the following which are altered:
- R15 Q12.10:** Handicaps will be based upon the Handicapper's estimate of the potential performance of each team over the four hour period. Both speeds achieved during practice and previous performance of the car/driver combination will be used as a guide.
- R16 Q12.10.1.** Any handicap may be modified after the start of the race if a team significantly improves upon its set handicap time. Re-handicaps will not be applied during the last hour of the race.
- R17** There will be no penalty for a push start. All other General Regulations of the MSA apply to this event.
- R18 TEAMS MANAGEMENT**
- a) To make the event more interesting, preference may be given to Teams consisting of the same make or type of car. For Class Award purposes, teams which fall into more than one class will be placed in the highest appropriate class.
  - b) A separate entry form must be submitted for each driver and they must, be submitted through a nominated Team Manager, to whom all further correspondence will be sent.
  - c) When the majority (two thirds) of a team emanates from one Club, that Club's name may be used in the Team Name. A Club team entry may be accepted even if the Club is not one of those invited, provided the drivers are eligible by way of membership of the MGCC or one of the invited clubs.
  - d) **HANDICAP CLASSIFICATION:** Each Team, except that in 'scratch' position, will be allocated a number of credit laps, presumed to have been run prior to the start of the race. If the handicapper considers that one or more of the cars in a team are substantially quicker than the remainder, he will assume that all cars in any team are to run for equal periods of time and will apply a limit to the maximum number of laps such a car or cars may complete. Any laps completed in excess of these maxima will not be credited to the team when calculating the handicap results but, for the purposes of the General Classification (R8 (2)), will be counted. Thus, Team Managers may, during the course of the Meeting, have to decide whether to concentrate on the Handicap or the General Classification.
  - e) **CAR CHANGE-OVER:** Each Team may have 1 car waiting in the pit garage ready to go out with its engine running when its team member on the circuit is due to come in. The outgoing car may not leave the team garage until it has been passed by the incoming car. (This WILL be monitored). Driver changes are not permitted in the pits. The pit lane speed limit of 60 KPH must be observed by both incoming and outgoing cars. A speed gun will be employed and marshals will be appointed as judges of this fact, with loss of 1 lap for offenders and possible exclusion for more than 1 offence. It is the Team that is penalised and the penalty may have to be served by car/driver currently on track when the penalty is awarded irrespective of which driver committed the offence.
- Refuelling is not allowed in the pits. If a team is ever found to have more than one car on the track at the same time then the laps covered by ALL those cars whilst this situation existed will be discounted, save that in the event of a car stopping out on the circuit for a reason beyond the drivers control, a replacement car may be sent out by the team manager, provided that the stricken car remains immobilised. However, should it subsequently return to the pits under its own power the team will lose two laps.
- SAFETY CAR:** Please see Supplementary Regulations Para. 12. In so far as the use of the Safety Car affects the handicap positions, time spent behind the safety car will be considered to be 'dead time' and will not count when computing the results. The handicap will be progressively adjusted to allow for the time notionally 'lost' and every effort will be made to provide Team Managers with up-to-date assessments as the race progresses.
- SPECIFICATION OF RACE VEHICLES:** Most of the cars entered will normally be used in other Racing Championships/Formulae. In order that the handicaps can be correctly computed, it is a condition of entry that all entries must state what championship or formula the car normally competes in and whether it is being raced in accordance with the pertinent regulations of that championship/formula or whether any alterations have been made (e.g. tyre type, engine size/specification, the fitment of aero-screens to replace full screens, additional carburettors, change of camshaft etc.) These items will be checked at random, both during Scrutineering and during the race and anyone discovered to have not declared any such modifications may either be excluded or have their handicap 'credit laps' amended accordingly.
- R19 DECLARATION OF FASTEST LAP:** Each driver may be required to supply evidence of his/her fastest lap at this circuit (or another UK circuit if not applicable) by way of an official race results sheet, in order to aid the setting of realistic handicaps. Failure to provide such evidence, if requested, may result in refusal of the team entry and will result in the team being handicapped according to any lap record of a similar vehicle, or any other method which the handicapper/s or organisers may choose. Any falsification of evidence of fastest lap will result in the refusal of the team entry or subsequent disqualification. The organisers wish to control the spread of performance of entries therefore the minimum target lap time for entries in any team is 1 minute 24 seconds. The organisers reserve the right to refuse entries quicker than this and to take action to restrict any car competing recording times substantially under this target.
