

1500 MGA REAR TURN INDICATOR LAMPS

By David Wright

Published in "Safety fast!" November 2013

Owners of 1500cc cars will be aware of the problems caused in today's traffic by the fact that your rear flashers are red. I had considered the conversion using the 1600 rear light, but apart from cost didn't really want to turn the car into a 'hybrid'. So I made a few sketches and came up with what I think is a satisfactory alternative, a low cost addition (under £25.00) including using period Flasher Indicators. The assembly is easily made and removable if need be, with no modification to the bodywork.

Here are other examples of orange rear lamps fitted to 1500 MGAs
